Summary — Experienced in optimizing infrastructure, automating delivery pipelines, and ensuring secure, scalable systems in India's leading fintech company. Spearheaded innovation projects, implemented emerging technologies, and contributed to blockchain initiatives by integrating solutions and securing smart contract deployments. Passionate about leveraging scalable blockchain technologies and enhancing decentralized applications (DApps). Adept at driving digital transformation through DevOps best practices, ensuring seamless, efficient, and automated operations in dynamic, high-performance environments. Skilled in continuous integration, continuous delivery (CI/CD), and maintaining the stability of production systems while supporting rapid development cycles.

Skills

•Golang •Hyperledger-fabric •SmartContract •Docker •Kubernetes •GCP •CICD •GIT •Helm-charts •HAProxy
•Certifications: Certified Kubernetes Administrator(CKA),Kubernetes and Cloud Native Associate (KCNA) , Certified Hyperledger fabric developer

Experience

National Payments Corporation of India (NPCI)
Senior Associate Blockchain Developer

Sep 2022 – Present
3 yrs

Tokenization Usecases (Market Innovation Products)

- Tokenization Use Cases: Developed and implemented innovative tokenization use cases, enhancing blockchain application functionality and driving project success.
- Hyperledger Fabric Expertise: Utilized Hyperledger Fabric blockchain technology to build secure, efficient applications, demonstrating in-depth knowledge of its capabilities.
- Deployment Expertise: Successfully deployed applications in both UAT and production environments, ensuring operational efficiency and reliability.
- Pipeline Design and Development: Designed and developed a comprehensive deployment pipeline for cluster environments, including a robust monitoring stack to ensure system health and performance.
- CI/CD Pipeline Design: Designed and implemented a comprehensive CI/CD (Continuous Integration/Continuous Deployment) pipeline for cluster environments, integrating a robust monitoring stack to track system health.
- Fintech Experience: Acquired extensive experience in the fintech industry, partnering with diverse organizations to explore blockchain use cases and implement best practices.
- Project Ownership: Managed end-to-end project ownership from code development through deployment, showcasing strong leadership and accountability throughout the software development lifecycle.

Hyperledger Fabric Scalability

- Hyperledger Fabric Scalability: Focused on enhancing scalability within Hyperledger Fabric implementations, contributing to increased efficiency and network reliability.
- Optimized transactions per second (TPS) for blockchain networks, significantly enhancing overall system performance.
- Deployment Management: Oversaw the complete deployment of Hyperledger Fabric solutions, ensuring robust setup, configuration, and adherence to best practices.
- Environment Deployment: Deployed multiple Hyperledger network environments across Kubernetes clusters and virtual machines (VMs), ensuring high availability and scalability.
- Cluster Fine-Tuning: Fine-tuned Kubernetes clusters to enhance performance and throughput, improving the reliability and responsiveness of the blockchain network.
- Benchmarking and Performance Evaluation: Conducted thorough benchmarking of the Hyperledger Fabric network to assess performance metrics and identify opportunities for enhancement.
- Central Bank Digital Currency (CBDC) Solutions: Developed scalable solutions aligned with initiatives related to the Indian Central Bank Digital Currency (CBDC), ensuring compliance and relevance to national standards.
- Cross-Functional Collaboration and Leadership: Demonstrated effective leadership and collaborative skills while working with cross-functional teams throughout the deployment process, fostering a culture of innovation and teamwork.

Education

Indian Institutes of Information Technology (IIIT Hyderabad)
PG diploma Blockchain and Distributed Ledger Technologies
Blockchain and Distributed Ledger Technologies
Bharat institute of Engineering and Technology
Bachelor of Technology Information Technology
